**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a method of processing returns, classified in class 705, subclass 22.
- II. Claims 10-16, drawn to a method of identifying an individual in a system of customers, classified in class 705, subclass 9.
- III. Claims 17-20, drawn to a computer system, classified in class 700, subclass 200.

The inventions are distinct, each from the other because:

Inventions I and II,III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as the method can be used to track one person's calling history and give a credit for calls which are dropped. See MPEP § 806.05(d).

Inventions II and I,III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a method of chat room interaction whereby concurrent contacts of an individual are displayed and can be contacted by people using the system. See MPEP § 806.05(d).

Inventions III and I,II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as a network word processing system. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
